

Errata

Academy of Nutrition and Dietetics Pocket Guide to Nutrition Assessment

Fourth Edition

Two errors have been found in this book.

1 - Box 4.12 on page 73: The book originally showed that the Uncorrected arm muscle area (AMA) equation was:

$$AMA(cm^2) = \frac{MAC(cm) - [TSF(cm) \times 3.14]^2}{4 \times 3.14}$$

The equation in the box should read as follows:

$$AMA(cm^2) = \frac{\{MAC(cm) - [TSF(cm) \times 3.14]\}^2}{4 \times 3.14}$$

2 - Box 8.10 on page 238: The book originally showed that the mL/kg method of estimating fluid needs was 100 mL for the first 10 kg of body weight.

The corrected method in the box should read as follows:

100 mL/kg for first 10 kg of body weight

Thank you to those that brought these errors to our attention.
